

Sustainability Insights

Danske Invest SICAV Global Index Restricted Class WA

Introduction

This document offers a comprehensive overview of the sustainability features and performance of this specific fund, focusing on its alignment with binding sustainability commitments.

It provides clear and factual information on key sustainability aspects, including the fund's performance in areas such as sustainable inclusion, active ownership and exclusion practices. The data included in this report is based on already reported data from the fund's most recently available SFDR annual report.

By presenting the fund's sustainability profile, the document reflects Danske Bank's commitment to transparency and responsible investing, supporting investors in making informed decisions that align with their financial goals and sustainability preferences.

Sustainability features

Danske Invest SICAV Global Index Restricted Class WA

What are sustainability features?

This fund is guided by binding sustainability commitments, which are defined in its investment strategy and legal documentation. These commitments ensure that specific sustainability principles and criteria are consistently applied throughout the investment process. They may include obligations to include defined sustainability features, exclude certain types of investments, and engage in active ownership activities such as engagement and voting. By adhering to these binding commitments, the fund ensures accountability and transparency in its approach to sustainability.

Sustainable investments

Danske Invest SICAV Global Index Restricted Class WA

What is a sustainable investment?

A sustainable investment is an investment in an economic activity that contributes to an environmental or social objective, provided it does not significantly harm other environmental or social objectives and that the investee companies follow good governance practices. Exposure to sustainable investments can be achieved through various asset classes and investment approaches.

Sustainable investments

- Listed Securities (SDG Model)
- Sustainability-labelled bonds
- Passive Investments (EU Climate Benchmark)
- Other (non-classified) investments

Sustainable investments development

The figures are based on the 2025 SFDR report.

Sustainable investments – low-carbon index funds

Danske Invest SICAV Global Index Restricted Class WA

What are sustainable investments for low-carbon index funds?

Funds tracking an EU Paris-Aligned Benchmark (PAB) or Climate Transition Benchmark (CTB) qualify as sustainable investments under the SFDR regulation. These benchmarks are two categories of EU climate standards designed to guide investments towards a low-carbon economy by establishing distinct decarbonisation trajectories.

Development (WACI)

Weighted Average Carbon Intensity (WACI)

WACI measures a portfolio's carbon emissions relative to the revenue of the companies the portfolio is invested in, adjusted by each company's weight in the portfolio. It reflects the carbon efficiency of the portfolio's investments.

Requirements for the portfolio

The portfolio must through the selection and weighting of underlying constituents achieve:

- a 50% carbon intensity (WACI) reduction for PAB or a 30% reduction for CTB, both compared to a broad market index.
- an annual 7% carbon intensity (WACI) reduction compared to the previous year.
- adherence to the benchmarks' exclusion categories.

Exclusions

Danske Invest SICAV Global Index Restricted Class WA

What are exclusions?

The product applies exclusions on certain criteria. Exclusions are applied to minimize risks and reduce negative impacts linked to specific investments.

Applicable exclusion criteria

Sustainability risk	Fossil fuel transition laggards	Controversial weapons	Pornography	Enhanced sustainability standards
SPU	Thermal coal mining	Tar sands	Tobacco	Peat-fired power generation
Alcohol	CTB	Fossil fuels	Commercial gambling	Military equipment
PAB	PAI	Extended enhanced sustainability standards		

Excluded

Not excluded

Number of excluded companies in benchmark

The figures are based on date 19-09-2026.

Certain products that invest through underlying funds may, in limited cases, be indirectly invested in issuers that are otherwise included on the list.

For further information, please refer to the restrictions described in the SFDR annex to the product's pre-contractual information and to the annual report on the product's application of exclusions in the SFDR report.

Active Ownership – engagements and voting

Danske Invest SICAV Global Index Restricted Class WA

What is active ownership?

The product uses active ownership as a measure to protect the value of our customers' investments and to manage the Principal Adverse Impact of the investments. In this product it is done through engagement with the companies we invest in and by voting at their general meetings.

Engagements

Danske Bank engages with issuers on financial, sustainability or other material topics. This is done to seek information or encourage better sustainability practices.

Voting

Voting is the exercise of ownership rights at the general meetings of companies in which the portfolios are invested. We vote on management and/or shareholder resolutions on corporate governance, environmental and social matters.

EU Taxonomy

Danske Invest SICAV Global Index Restricted Class WA

What is the EU Taxonomy?

The EU taxonomy is a classification system that defines which economic activities are environmentally sustainable. It supports investments in activities that align with the EU's goal of net zero emissions by 2050 and other environmental goals.

Revenue: Total income generated from sales of products or services.

Capital Expenditures (CapEx): Long-term investments in assets like buildings, machinery or technology.

Operational Expenditures (OpEx): Daily costs to run the business, like raw materials, utilities or maintenance and repairs.
